

Property Service Poles

Property Service Poles are required where a new subdivision still maintains an overhead Energex Network instead of running services underground.

Property Service Poles will also be used when subdividing existing blocks where the overhead mains coming from the Energex Power pole would otherwise cross the neighbouring property.

All of our Property Service Poles come in Galvanised or Ripple Black Powder Coating as standard. We also offer custom colours and Marine grade coating (for poles located within 500m of breaking surf) for an additional fee.

We offer foundation design and engineering certification based on Geotechnical report review as required.

- All poles are designed and certified by an RPEQ Certified Engineer as standard
- Foundation cage lengths are based on assumed average soil conditions
- Optional Meter Box Brackets available

1kN	3.5kN	7kN
5m	6m	6m & 6.5m
6m	8m	7m & 7.5m
8m		8m

Property Service Poles

We offer standard freight pricing. Delivery via Ute, hand offload only.

Metro Brisbane: \$160

Logan and Ipswich: \$185
